HTML/CSS - Rickard Petersen Upgift 1 - FED15

Till den h r uppgiften valde jag att b de anv nda en div-l sning och en table-l sning.
Och d divs till headern och tables till vad jag kallade "section links" allts dem tre l nkarna I mitten.
Anledningen till detta beslut var helt enkelt att jag ville ha lite repition i b da grejerna.

F rs kte h lla mig bortta fr n floats och anv nde mestadels inline-block f r att positionera divsen.

S h r I efterhand k nner jag att jag kankse la lite f r stor vikt p att f alla element att matcha exakt p
pixeln var dem l g I referens-bilden. S min css blev lite nedsmuttsad med massa margins och
paddings osv. Om jag skulle g ra om den s skulle jag nog k rt lite mer "klasser som attribut" som du
visade p sista lektionen.

Annars r jag ganska n jd med hur pass lik sidan blev bilden.

```html
